INTERNSHIPS

AI Intern — IBM SkillsBuild – Edunet Foundation 2025 (Ongoing)

- Currently working on AI/ML projects as part of IBM SkillsBuild program in collaboration with Edunet Foundation
- Gaining hands-on experience with IBM's AI tools, machine learning workflows, and practical data science applications
- Building industry-relevant skills in artificial intelligence under structured mentorship

Microsoft AI Azure Intern — Microsoft – Virtual Internship June 2025

- Worked with Microsoft Azure's AI services and cloud-based data pipelines
- Gained exposure to real-world AI/ML deployment on the Azure cloud platform
- Completed structured assignments on AI model workflows and cloud computing fundamentals

PROJECTS

E-Commerce Sales Analysis with AI Prediction — Personal Project 2025

- Built a full Streamlit web app for sales data analysis, visualization, and forecasting
- Used Python (Pandas, Matplotlib) for data processing and AI-based prediction on e-commerce datasets
- Deployed interactive dashboard for exploring trends, seasonal patterns, and revenue forecasts

Data Analysis Project — Python / Pandas 2025

- Performed end-to-end data cleaning, transformation, and exploratory analysis using Pandas
- Extracted meaningful patterns and business insights from raw datasets
- Built reusable data-handling pipelines and documented findings in structured reports

Financial Market Analysis — Self-Driven Research 2024 – Present

- Applied 3+ years of stock and forex trading knowledge to analyze historical market data
- Studied breakout strategies, liquidity sweeps, and price behavior in high-probability zones
- Developed rule-based, data-driven trading frameworks with consistent risk management

TRADING & FINANCIAL MARKET EXPERIENCE

Independent Trader – Indian Stock Market (NSE / BSE) — 2023 – Present

- Actively traded Indian equities for 3+ years across NSE and BSE
- Applied technical analysis, price action, support/resistance, and breakout strategies
- Maintained consistent risk management rules and a disciplined, rule-based trading system

Independent Trader – Forex Market — 2025 – Present

- Traded major and minor currency pairs in the global Forex market
- Studied institutional order flow, liquidity concepts, and high-probability trade setups
- Developed strong discipline around entry, exit, and position sizing in volatile markets

EDUCATION

B.Tech – Computer Science & Engineering (3rd Year) — RVS College of Engineering and Technology, Jamshedpur 2023 – 2027

- Core subjects: Data Structures, Operating Systems, DBMS, Python Programming

SKILLS

Languages	Python, C, JavaScript
Data & AI	Pandas, NumPy, Streamlit, Scikit-learn, IBM AI Tools, Azure AI
Web	HTML, CSS
Database	SQL, DBMS
Finance	Technical Analysis, Forex Trading, Indian Equities (NSE/BSE), Risk Management
Tools	Git, GitHub, VS Code, Microsoft Azure
Soft Skills	Problem Solving, Analytical Thinking, Discipline, Self-Learning
